IN STOPE, TUNNEL, DRIFT AND MILL.

THE HONERINE WEST

Launching of a New Stockton Company.

CAPITALIZED AT \$2,500,000

Over 200 Acres in Heart of the Zone.

Prominent Salt Lakers Add Another to the List of Active Properties in the Old Camp.

With over 200 acres on the mineralbearing zone at Stockton, and a cluster of ledges from which ores of the value of several hundred thousand dollars have been raised, the Honerine West Mining company, with a capitalization of \$2,500,000 will be launched today, a campaign of energetic development to follow at once. As the christening of the youngster implies, its estate, which embraces as many as twenty-three mining claims, adjoins that of the Honerine Mining company on the west, its territory traversed by the latter's main ledge, while in the unwatering of ore-bearing channels with which the zone is catacombed, those of the new company have been included. The Bunker Hill, the Little Jessie and several oth-ers in the Honerine West's possessions were in former years worked to depths to which the waters rose with most profitable results, while samples taken from the ledges reveal the presence of ore at this time which shows most sen-sational contents in silver, as well as in lead. It is the intention to tap and explore the various ledges by which the territory is traversed through a main shaft on Jessie ground, which has been productive of over \$100,000, and to that end the ground is now being prospected. In the system of veins embraced within the Honerine West are included the Ada, the St. Patrick and Hercules on the north of the Honerine, with four well-defined cross-fissures on the south, and the founders of the new company have no doubt of the ultimate produc-tiveness of them. Already the waters in the Jessie's old workings have receded so that the management expects to reach the Honerine tunnel level, 700 feet below, without need of pumps, al-though the equipment will be as elab-

orate as that of any undertaking in the famous old camp.

In the organization for the first year B. F. Bauer has been selected as president and treasurer, with Fred C. Richmond as vice-president and secretary, there officials, with M. H. Soules, S. V. Ham and E. J. Raddatz to serve as directors. The undertaking opens up an empire of possibilities, and the present var should witness an active producyear should witness an active produc-

JURY TRIALS FOR MINE CONFLICTS

The Senate Committee on Mines and Mining has recommended the passage of a bill by Senator Heyburn of Idaho, in which it is provided that all suits filed in any United States land office in Sales. High. Low. (Sales, High. Low. support of an adverse claim against an application for patent shall be deemed actions at law, to be tried as are other actions at law, in courts having jurisdiction of the subject matter of the suit The object of the bill is to harmonize the practice in the courts. The com-mittee in support of its recommendation says the questions upon which the validity of mining locations is estab-lished generall depends upon the testimony of miners and prospectors who were present at the time of location, or who have knowledge of the markings of the claim upon the ground and very often depend upon conditions that are only to be determined by an inspection of the premises by the jury. In some States the court sits from 100 to 500 miles from the place where the prop-erty is situated and has no opportunity of meeting the witnesses face to for to judge of their manner in giving tes-timony, etc. "All men," says the com-mittee, "look alike on paper, and the shifty and vaciliating witness whose manner would at once condemn him in the mind of the court is often, from the record, made to appear in a light quite as favorable as the witness who is candid, etc.
"The courts should not be at Hberty

to hold at their will that a man should or should not have a jury trial of this kind. From the days when such matters were settled by a miners' court, sitting in the immediate vicinity of the controversy, and hearing the state-ments and testimony of men upon the ground, it has been obvious that the only safe rule by which to arrive at a just determination of the rights of con-tending parties was trial by jury and the introduction of testimony in the presence of a tribunal whether it he presence of a tribunal, whether it be a court or a jury. There can be no possi-ble objection to defining the nature/of an action to be brought in support of an adverse claim in a mining cose, and this bill will establish a uniform rule governing such cases."

CAMPAIGN AT THE OLD MAMMOTH

The active raising of ore was resumed at the properties of the Mammoth Mining company in Tintic yesterday morning, the output to be disposed of on the open market until such time as the management feels that it is justified in contracting for its reduction. On the 500-foot level the new stope reveals a body of copper-bear-ing ore which is maintaining a fine aver-age, with not a little of it a class from which dividends have been derived in the past, while from lower levels is being raised a quality of gold ore the metallic raisents of which are environments. coutents of which are reminiscent of the paimiest days in the career of the property which has afforded dividends amounting to \$1,890,000, with ores of a gross value exceeding \$5,000,000. Indeed the Manmoth, underground, looks more like its former self than at any period in many years, while over 100 persons are now on the pay-

A STUPID DAY ON LOCAL EXCHANGE

The day on the mining exchange closed on the sale of 6030 shares of stock, for \$3451.25, and with the market settled down into a torpor that is distressing not only to the investor, but also to those reliant on it for their daily bread. It was the on it for their daily bread. It was the "open board," indeed that saved the day, the trading in the pit confined to less than \$120. Yankee Con. was the only bargain it which any business was done at the opening session within the rail, while the transactions during the afterneon were confined to Century and Little Chief. On the open board Daily West recorded a transfer at \$34.0, while Grand Central came forth to a bid of \$2.77\(\frac{1}{2}\), with Lower Mammoth responding to one of 41\(\frac{1}{2}\), ents. Tetro executed an order for 1000 shares, according to the log, at \$4\(\frac{1}{2}\), while the talent wasted the bolance of its energies in sparring. Ontarlo, for which \$5\(\text{ was bid was held in little higher esteem than was it last week on the New York market, while \$4.2\(\frac{1}{2}\) was held out to Daly-Judge and \$2\(\frac{1}{2}\) to Daly, the day closing on the following market:

NEW YORK BUYING

OF UTAH CON.

New York continues, says Hayden Stone of Boston, to add to its Utah Con. hold-Ings at every opportunity, but by this line Boston has a pretty good idea of as to the value of the property and is not parting with its shares. The original owners in Utah after seiling out to the Standard Oil people have repurchased a large part of their stock at under \$25 per share, and it is questioned if the Standard Oil interests are today in actual control of the property, elthough they have the management of it. With an output of 20,000,000 pounds of copper or more, stockholders have a prospect of receiving better than \$4 per annum in dividends. ings at every opportunity, but by this time

UTAH MINING SHARES IN THE FAR EAST

The United States Investor of Boston, replying to an inquiry from Barre, Vt., concerning several Utah securities as an investment, says of Silver King that "It is well regarded and should prove a good is well regarded and should prove a good mining investment," and as much of Daly West. "The Utah Consolidated stock is well regarded, especially at any reactions from present prices, 35½c, at which figure it is now selling on the Boston stock exchange. The company now pays \$1.50 semi-annually on its stock, its not earnings averaging about \$4 per annum on the stock. The company contemplates increasing its capacity, which will, in time, increase both its production and income."

Much Ore at Uranium. A special dispatch to the Denver News

from Uranium, Colo., says: In numbers of claims and quantities of both high and low-grade uranium and vanadium ore, this section of Montrose county takes the

lead.

We have an abundance of ore, plenty of wood and water, a number of good millsites and good wagen roads. The greatest drawback to our camp is the want of a good concentrating mill for the reduction of our ore, in order to reduce

the expense of transporting the output to market. Our camp is about seventy-five miles south of Grand Junction and about the same distance west of Placeyville, on the Rio Grande Southern railrond.

At the neighboring camp of Hydraule, some eight miles east, there are quite a number of locations that show large boiles of good grade are, and it is aste to say there are hundreds of tons of ore in sight. There has not been much ore shipped from either camp, the miners preferring to hold their ore till some enterprising parties can be found who are willing to put in a mill for the reduction of the same, as the cost of transportation is too great to stand shipping anything but high-grade ore.

GRAND CENTRAL'S

NEW ORE BODIES

Recent developments at the Grand Central's Timic properties have been with the most gratifying results, according to reports from the locality and everything deotes a steady distribution of dividends for an indefinite period. On the 160-foot level connection has been made with the hannel from which so much wealth is being derived for feet above, and while the extent of the ore bodies along that horin has not been determined it has every appearance of developing strength equal to that on the 800-foot level. The intention of the management now is to drop down on the channel to the IRO6-foot station, when the level will be run out to connect with it there. Meanwhile the usual dividend, it is said, will be posted for payment on March 20th.

JIM BURNS AND

HIS ADVERSARIES

COLORADO SPRINGS. March 2-Judge Seeds in the District court has granted James F. Burns, the mining man, a permanent injunction, against J. D. O'Haire, restraining the latter from prosecuting, in the courts of Pottawatto mie county, Iowa, a suit for \$200,000 O'Haire's attorneys claim that the local ourt had no jurisdiction in the matter but the court decided that both parties being citizens of Colorado he could restrain one from suing the other in an other State If the ground justified. O'Haire sued for damages, charging that Burns had defrauded him in the original deal in regard to the Portland mine at Crippie Creek. O'Haire, James Doyle, Burns and J. J. O'Drincoll were prospectors together at the time the great Portland mine was discovered. All three have at different times sued Burns, charging fraudulent action in the filing of papers showing the location of the mine. The suit started by O'Haire in lows is a repetition of the suits filed in the courts of Colorado. An appeal to the State Court of Appeals has been taken. other State If the ground Justified,

UGLY SLIMES ON

THE WEST DIP

Slimes are causing the management of the Dalsy mill out of Mercur not a little annoyance and incurring losses, said Arreclamation of West Dip, yesterday, that may terminate in the closing down of the plant until such time as a refnedy has been provided. The ore during February has maintained an average better than of the family can take 14, he added, but the slimes are depriying 34, he added, but the silmes are depriving it of 50 per cent of the contents that are carried onto the dump, thus reducing the margin to the narrowest. To correct this, Mr. Murphy, who will meet with his associates the present week, has several methods in view, but to install them a suspension of several weeks will be entailed. Of 34 ore he reports considerable in the property, which has met with so many misfortunes, and with the silmes in subjection he sees a commercial proposition ahead of him.

ANOTHER OPTION ON CONTACT COPPER

According to a story from Tonopah, tall Eastern crowd is negotiating for the acquisition of the Contact Copper group out of Sodaville, which was some time ago purchased by Salt Lake talen, and which is now being developed by W. R. Smith, formerly of Bingham. Mr. Smith confesses to having fixed a price on the group at the solicitation of Eastern investors, on whose examination he now walking.

Short Line Wrecking Machine to Rescue.

Distress of Furnaces to Be Relieved.

Crushing of Ores at Copper Company's New Plant Delayed-Ohio Mill Hung Up.

To restore the Ill-fated locomotive to the tracks of the Copper Belt railway at Elingham and to relieve the distress that threatens mills and furnaces which are reliant on over from that nost productive circuit, the managenent of the road has procured assistince from the Oregon Short Line, and with its powerful steam wrecking machine the work will begin this morning The interruption, which has been felt throughout the camp and valley, is regretted by none as much as it is by the management of the railway, who was constrainating itself that a borrowed locomotive would be made to relieve the situation when it was found that it had to be the situation when it was found that it had to be the situation when it was found that it had to be the situation when it was found that it had to be the situation when it was found that it had to be the situation when it was found that it had to be the situation when it was found that it had to be seen and the situation when it was found to the situation when it was found to the situation when it was found to be seen felt throughout the situation when it was found to be seen felt throughout the situation when it is by that it had to go to the roundhouse for repairs. To date only the Ohio mill has felt the effects of the accident so acutely as to be compelled to shut down until its bins can be reloaded, and the management of the road felt last night that all others would be aved. The Yampa smelter in Bingham canyon, said Capt. Stern during the afternoon, has some ore remaining in its bins with which to keep its blast live, while the Bingham Con, smeller silve, while the Bingham Can, smeller, whose Commercial group is momentarily excluded from the market, has other sources to which to appeal. The management of the Utah Copper company was disappointed in that it was unable to procure ores yesterday on which to start its crushers, but withat the various interests are taking resignedly to the inevitable and doing all in their power to lighten the woes of the rallway management. Cant of the railway management. Capt. MacVichie said during the afternoon that he hoped to have ore moving tomorrow morning.

THE HORN SILVER'S FEBRUARY OUTPUT

The management of the Horn Silver of Frisco closed the month with an output of 1600 tons of ore divided between lead and copper and of which volume there were eighty tons of concentrates. Notwithstanding the irregularity with which the company, with a dividend record exceeding \$5,000,000, has been distributing bread-money, the condition of the mines at this time is quite assuring, and not a few are there who believe that it will again be among the most productive in the State. The copper product from the property compares with any that is seen upon the market, while the percentages contained in the lead ore are better than the in the lead ore are better than the per cent copper, with some silver. The concentrates at the property is idle at present, but will go into commission gain as soon as the supply of milling

FROM THE GALENA

Active development has been resumed at the properties of the Galena Mining company, three miles north of the O. K. group in the Beaver Lake district, and while the ores are yet spotted, that which has been shipped netted the comwhich has been shipped netted the com-pany about \$60 per ton, while picked samples reveal over 1000 ounces silver, with a fine percentage of lead. The management is now drifting with the ledge off the 100-foct level, and en-countering bunches of ore which shaws from 41 to 90 ounces silver and from 50 to 56 per cent lead. The prospect is a most likely one, and the management expects to soon have it among the active producers in that locality
